The Art of Precision

At Metal Craft Studio, we believe that luxury lies in the details. We don't just manufacture furniture and screens; we engineer architectural art. Catering exclusively to high-end residential, commercial, and hospitality projects, we transform premium stainless steel into timeless design statements.

Precision In Every Fold

Uncompromising Excellence | The MCS Advantage

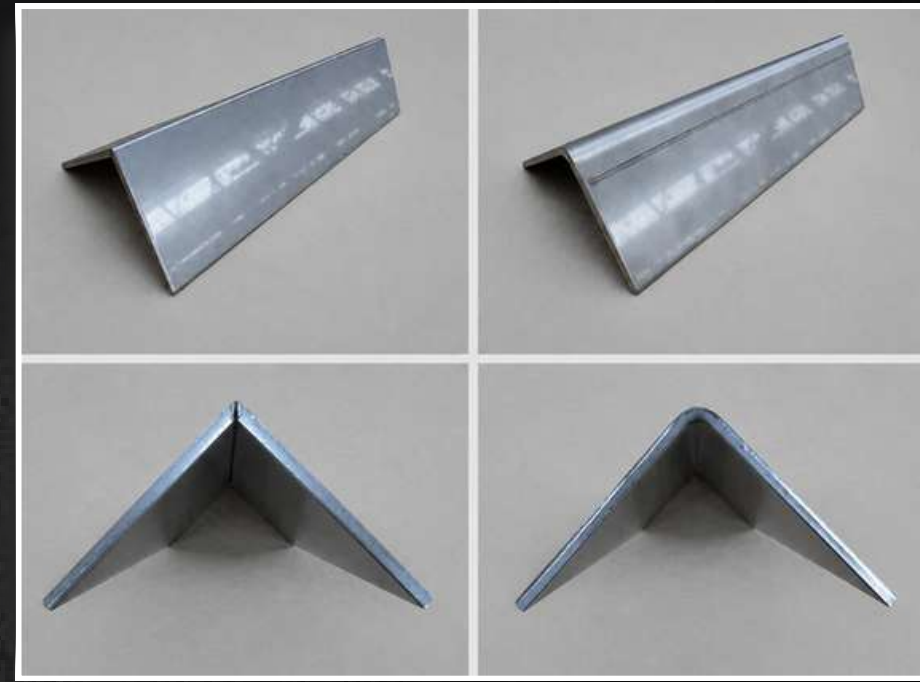

Post-Fabrication PVD Coating: The ultimate mark of luxury. We never use cheap, pre-coated ready-made sheets that leave raw, silver edges at the joints. Every MCS piece is fully cut, bent, seamlessly welded, and meticulously buffed before it enters the PVD chamber. This guarantees absolute uniform color depth, flawless joints, and lifetime finish durability.

Flawless V-Grooving & CNC Bending:
Our advanced V-grooving and CNC bending technology ensures that every bend is perfectly sharp, crisp, and structurally sound.

True Geometric Integrity:
We specialize exclusively in sharp-cornered square and rectangular profiles. No soft edges, no compromise on form—just clean, powerful, modern lines.

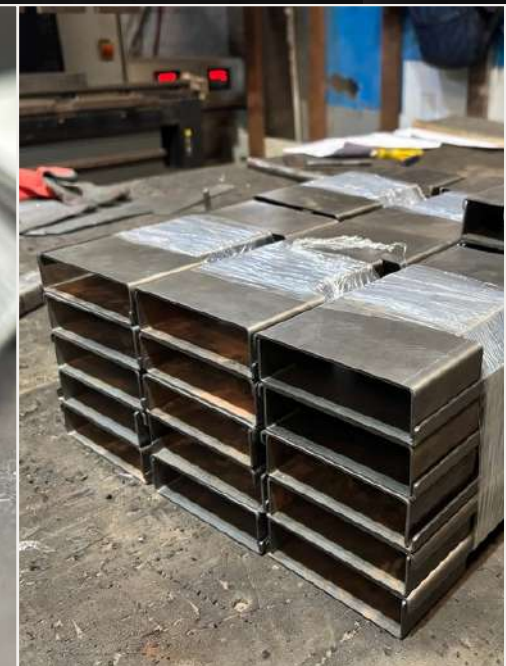

SHARP EDGE BENDING

TYPICAL BENDING

What We Do

- > PVD Coating Support for premium luxury finishes
- > Custom Design & Prototype Development Support
- > Welding & Finishing Stations for seamless fabrication quality
- > Skilled Technical Team with expertise in architectural metal fabrication
- > Bulk Production Capability for large commercial and hospitality projects
- > Dedicated Quality Inspection Area for precision checking at every stage
- > Stainless Steel Sheet Processing Units for custom architectural profiles

Machinery

- Advanced CNC Bending Machines for accurate and repeatable bends
- Precision V-Grooving Machines for sharp luxury metal corner finishes
- High-Performance Laser Cutting Systems for detailed fabrication work

Industries We Serve

- > Luxury Interior Projects
- > Hotel & Restaurant Interiors
- > Retail Store Fixtures
- > Architectural Metal Profiles
- > Decorative Metal Panels
- > Elevator Cladding
- > Furniture Components
- > Custom Metal Fabrication Projects

BRASS

Premium decorative metallic appearance

COPPER

Rich tones for luxury interiors

MILD STEEL

Strong and versatile structural solution

BRONZE

Rich tones for luxury interiors

We Work With

STAINLESS STEEL

Luxury finish with superior durability

ALUMINUM

Lightweight and corrosion resistant

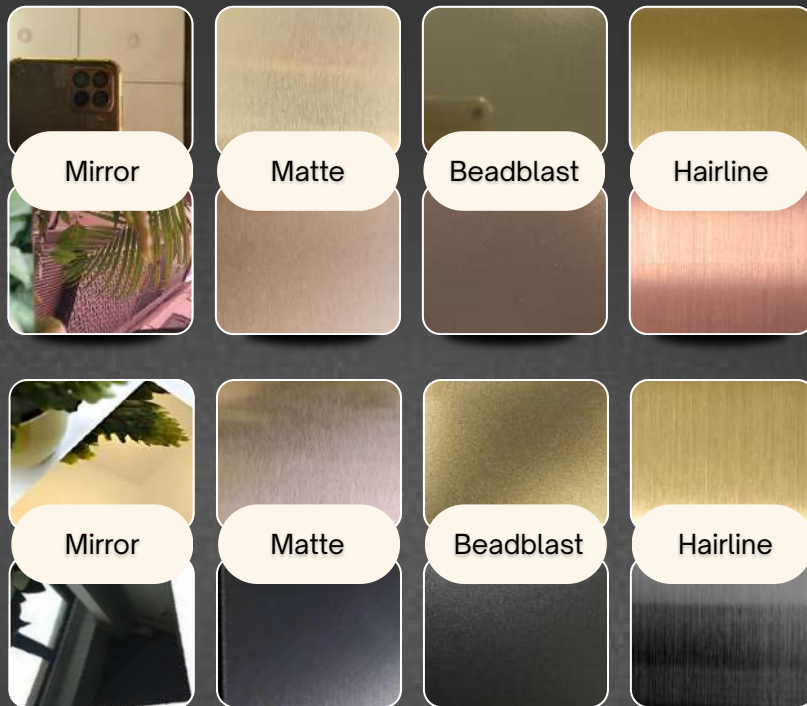

ZINC

Modern architectural material with unique texture

Coating & Finishes

PVD Coating

Gold | Rose Gold | Champagne Gold | Black

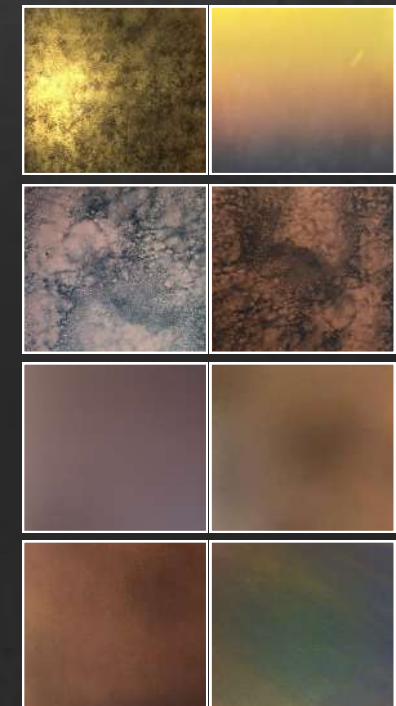

Powder

Coating

Custom

Metallic Coating

Our Capabilities

- > Customization Flexibility
- > Smooth Bulk Order Execution
- > Premium Luxury Finishing Standards
- > High Precision Manufacturing
- > Faster Production Turnaround
- > Consistent Quality Control

CNC-Laser Cutting

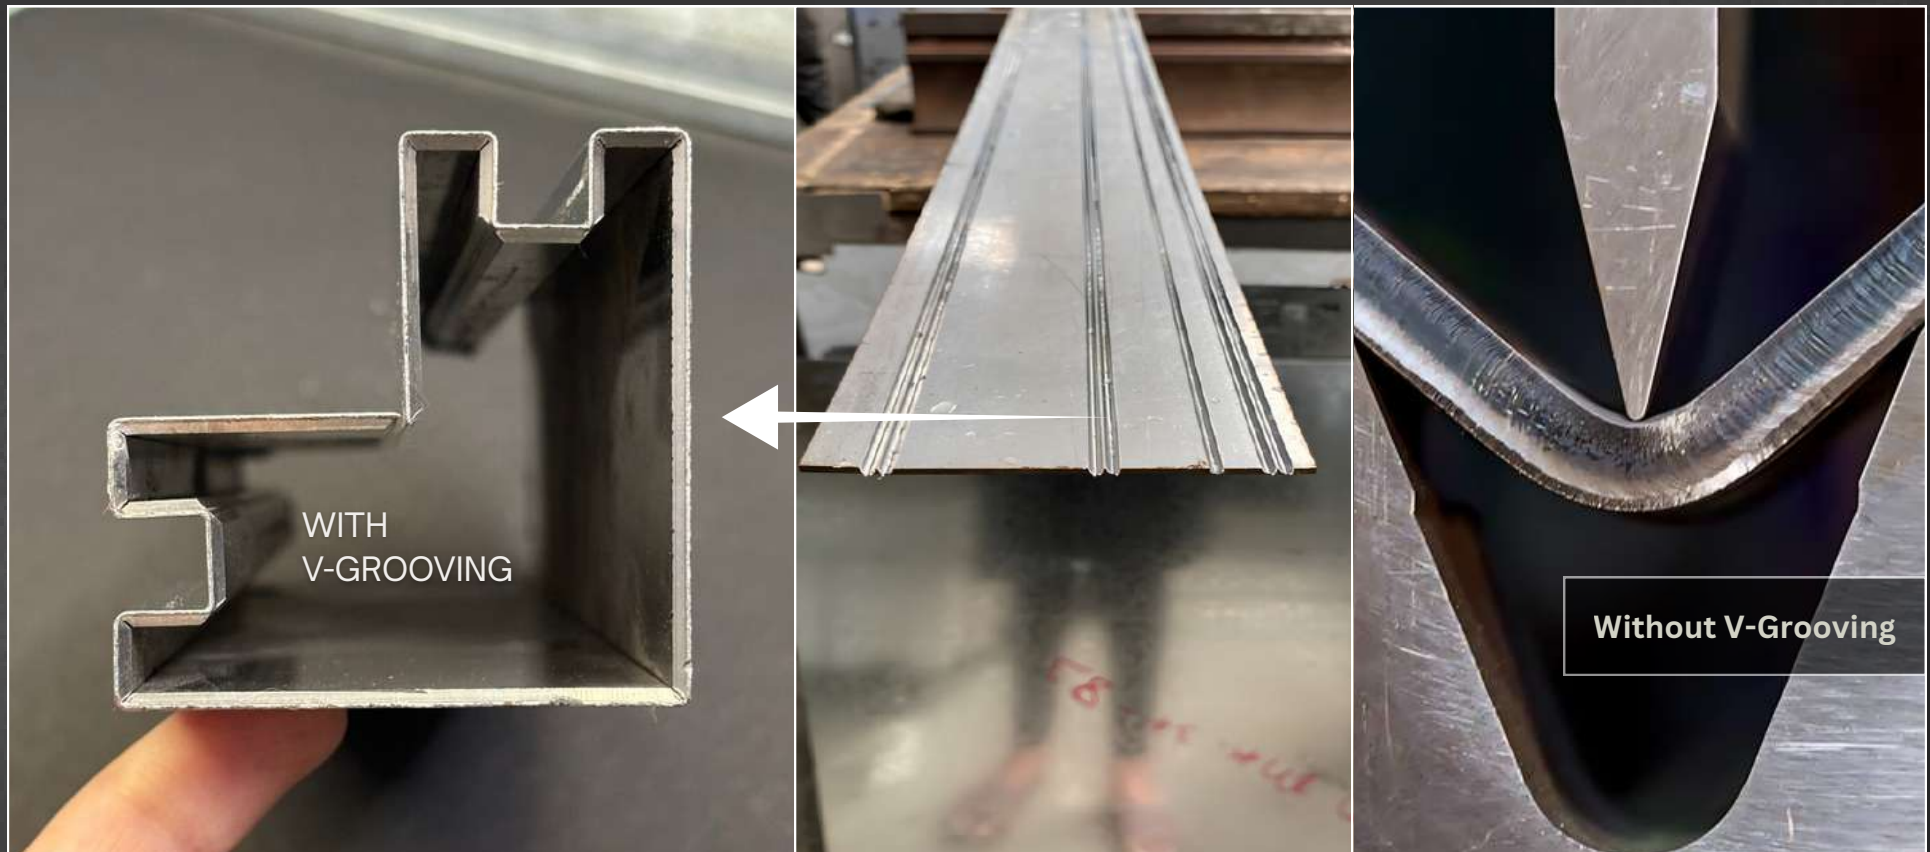

Complex Patterns | Sharp Detailing | Perfect Accuracy

We manufacture decorative panels, gates, screens, facades, and custom architectural designs with high-precision laser technology

V-Grooving Technology

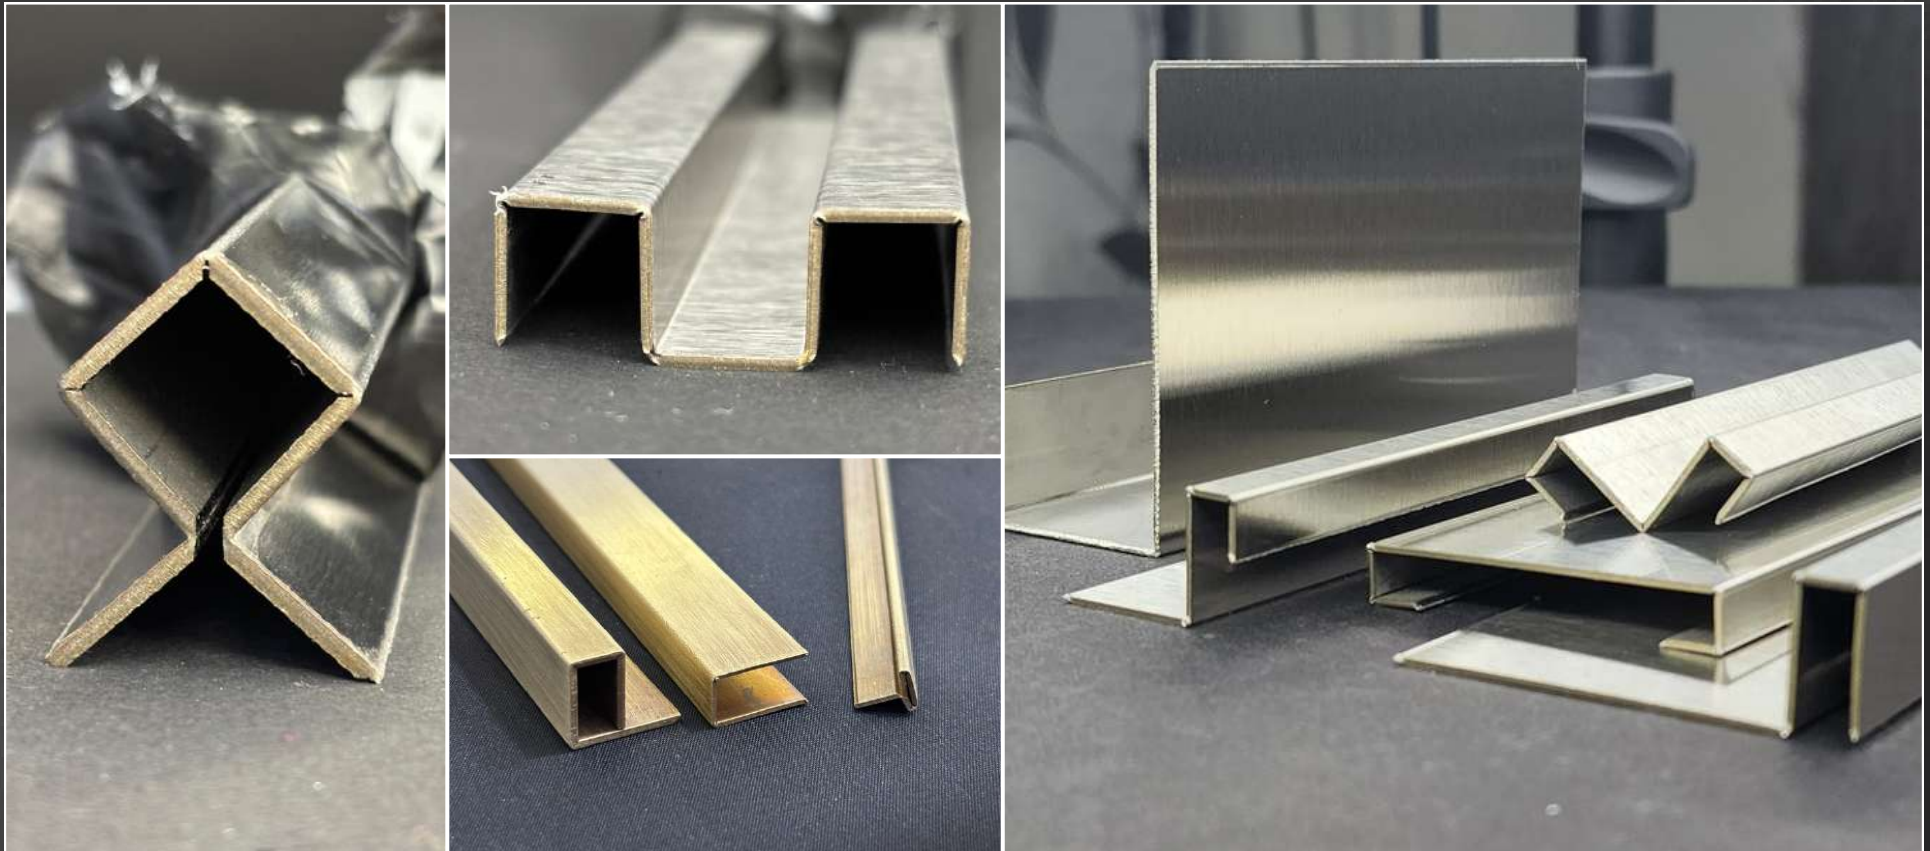

Sharp Edges That Redefine Premium Fabrication

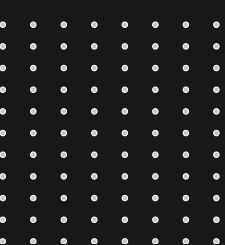

Our V-grooving process creates flawless bends With seamless joints and luxury-grade finishing quality

Custom Metal Sheet Bending

Custom Shape | Custom Size | Custom Thickness

Our V-grooving process creates flawless bends With seamless joints and luxury-grade finishing quality

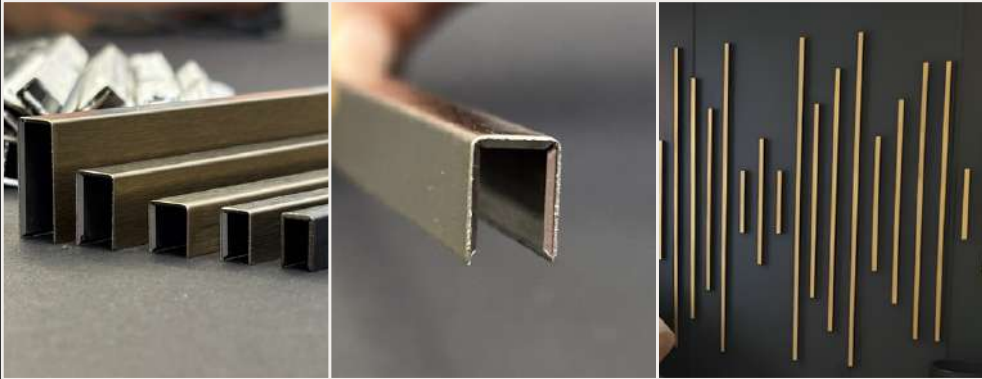

Standard Metal Profiles

L Profile, M Profile, U & C Profile, T Profile, Flat Patti & Custom Profiles

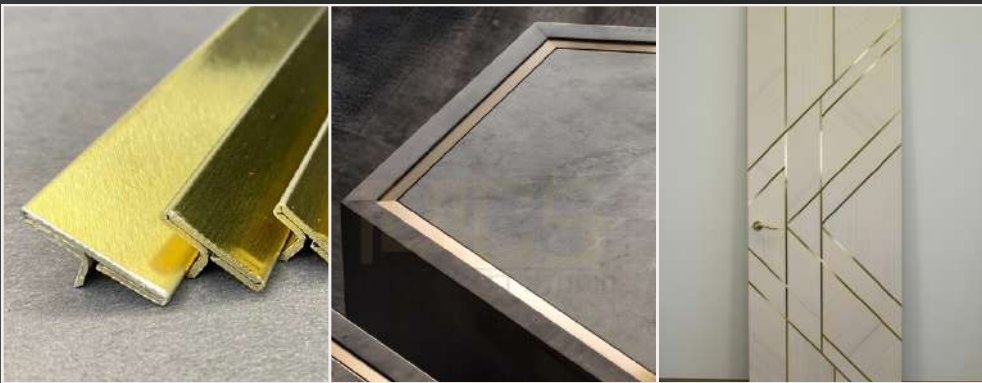

Manufactured with precision and available in multiple finishes including mirror, matte, brushed, hairline and PVD coating.

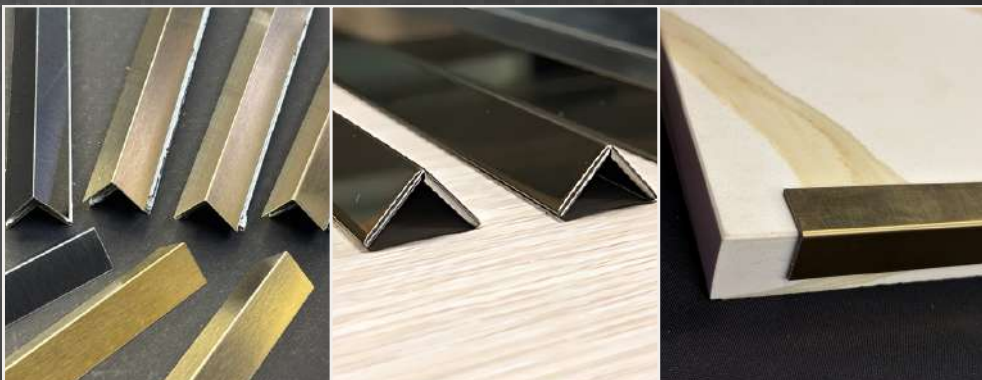

U & C Profile

Provides strong and clean channel support with sleek finishing aesthetics. Commonly used in glass sections, louvers, wall panels, metal frameworks, tile edges, furniture detailing, and architectural applications.

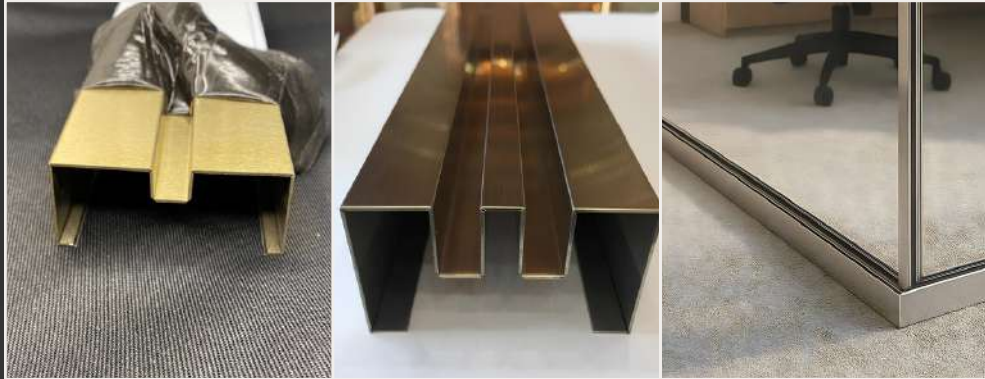

T Profile

Creates elegant joint separation with a luxury finishing touch. Used in flooring joints, wall grooves, ceilings, and interior detailing.

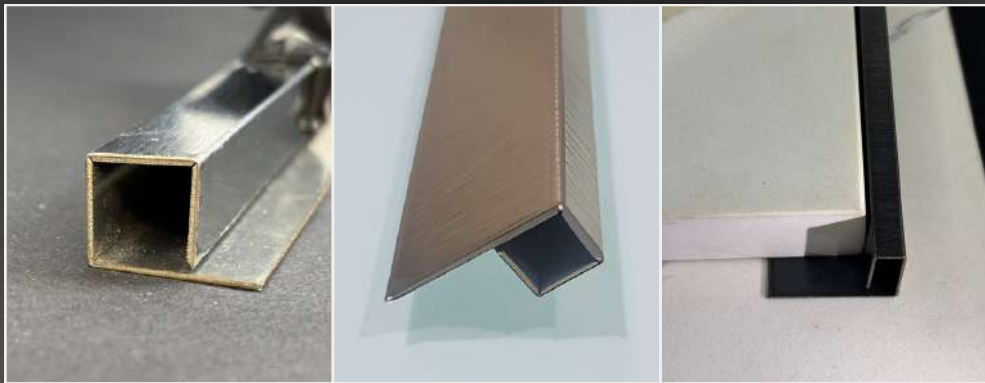

L Profile

Perfect for edge finishing, corner protection, and premium architectural detailing. Widely used in furniture, wall panels, kitchens, and decorative interior applications.

M Profile

Designed for seamless panel joining with a clean modern appearance. Ideal for partitions, wall cladding, and decorative surface transitions.

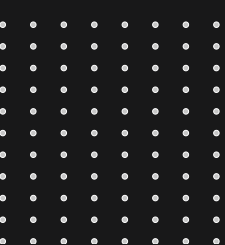

P Channel

Commonly used in partitions, furniture frameworks, wall panels, glass sections, wall corner, and decorative architectural applications.

Flat Patti

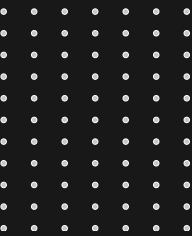

Provides clean linear detailing with a sleek premium finish. Commonly used in wall patterns, ceiling highlights, furniture borders, flooring inlays, partitions, and decorative interior applications.

Custom Metal Profiles

Complex Shapes, Custom Sizes, Any Thickness — Only Precision Manufacturing

We craft zero-radius bending, seamless curved panels, multi-angle folding, invisible joint fabrication, mirror-finish bending, double-curvature designs, spiral structures, parametric fabrication, and precision bending solutions for thin & thick metal sheets

Custom 2mm U Profiles (Sharp Edge)

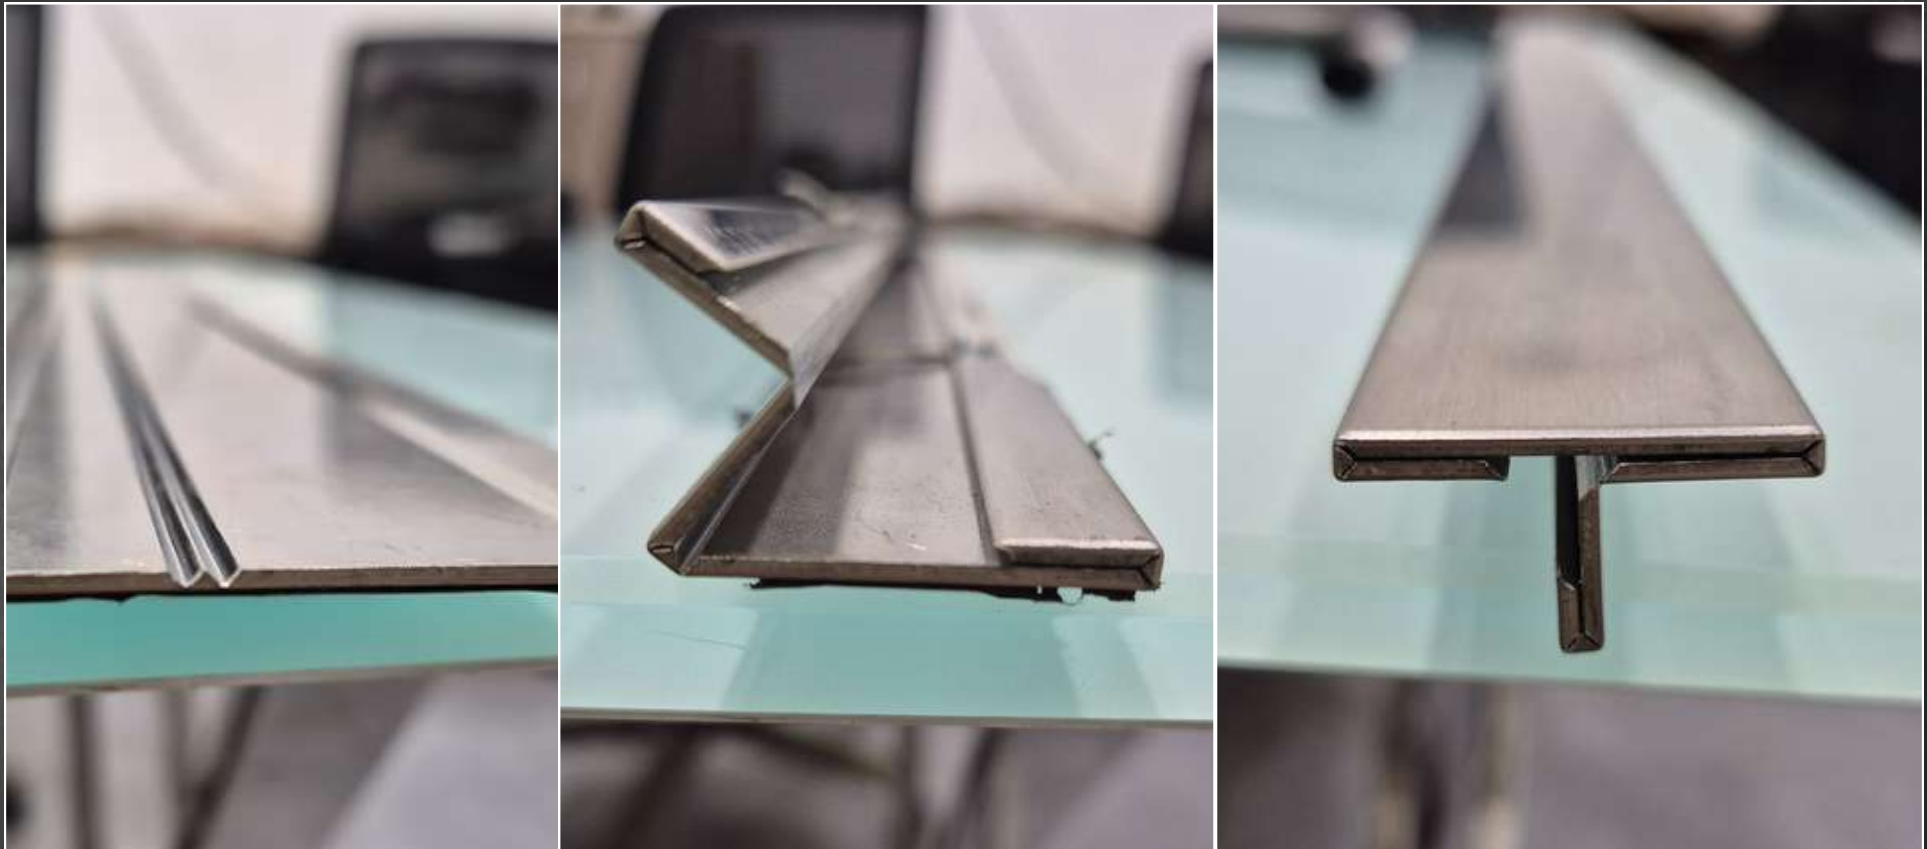

From 0.25mm to 4mm Thickness As Per Requirements

Designed for projects that demand precision engineering & premium aesthetics

Custom 1.5mm T Profiles (Sharp Edge)

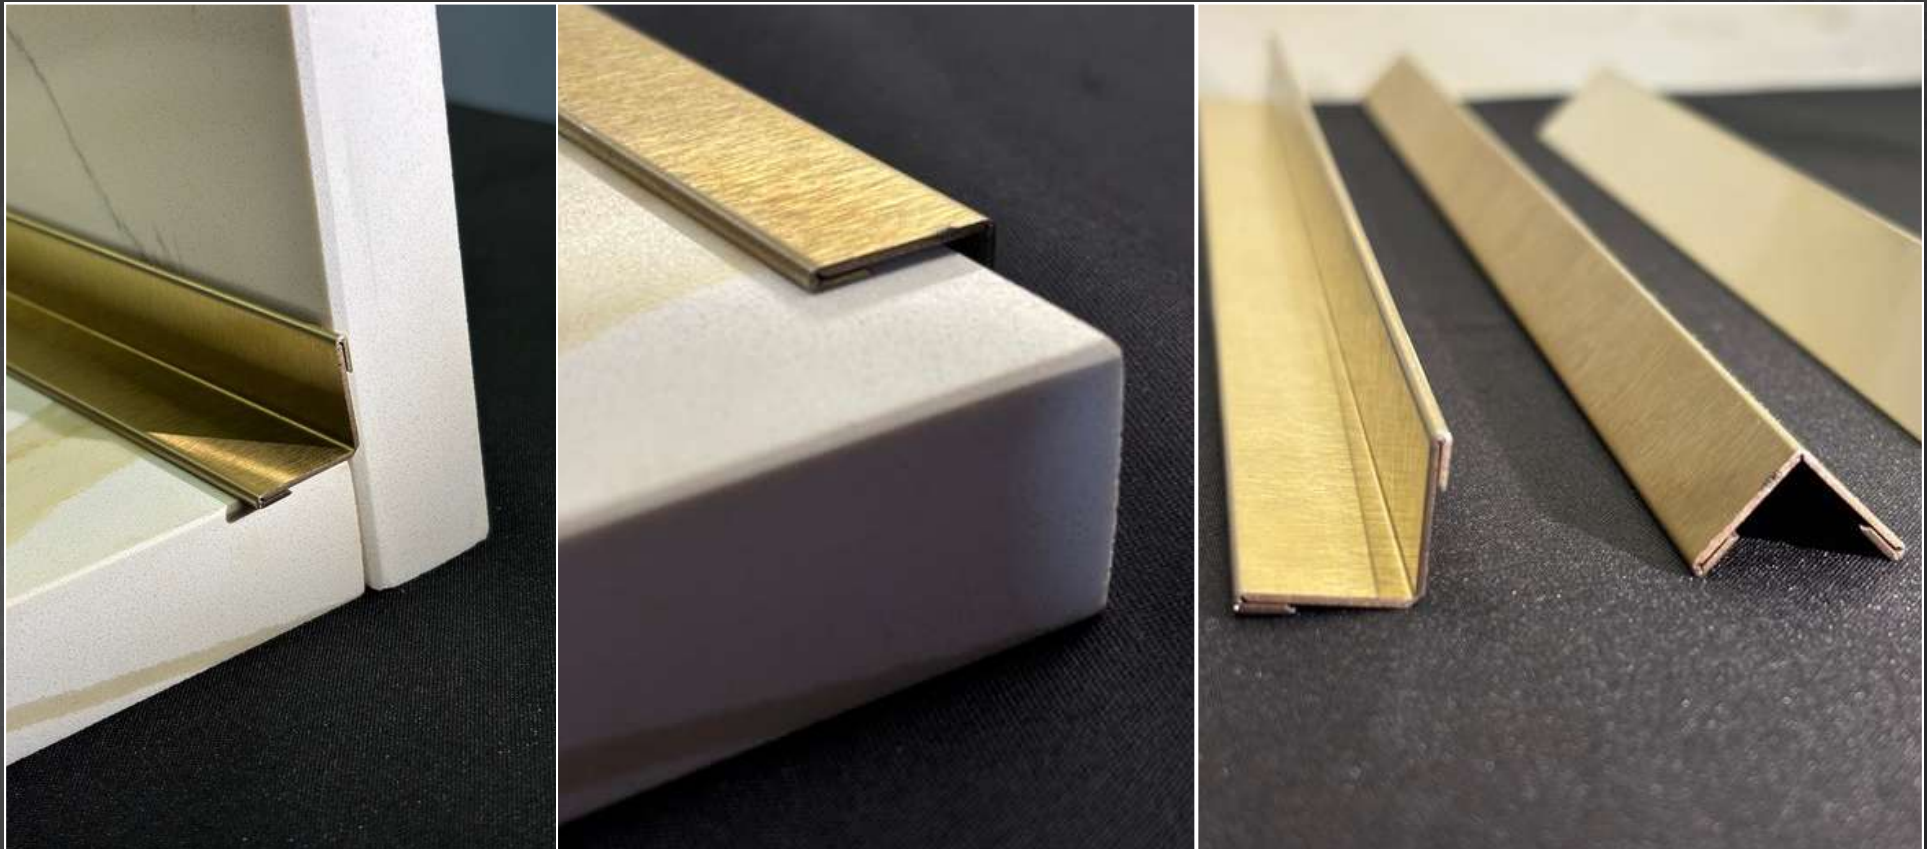

From 0.25mm to 4mm Thickness As Per Requirements

Designed for projects that demand precision engineering & premium aesthetics

Custom L Profiles (Seamless Edge)

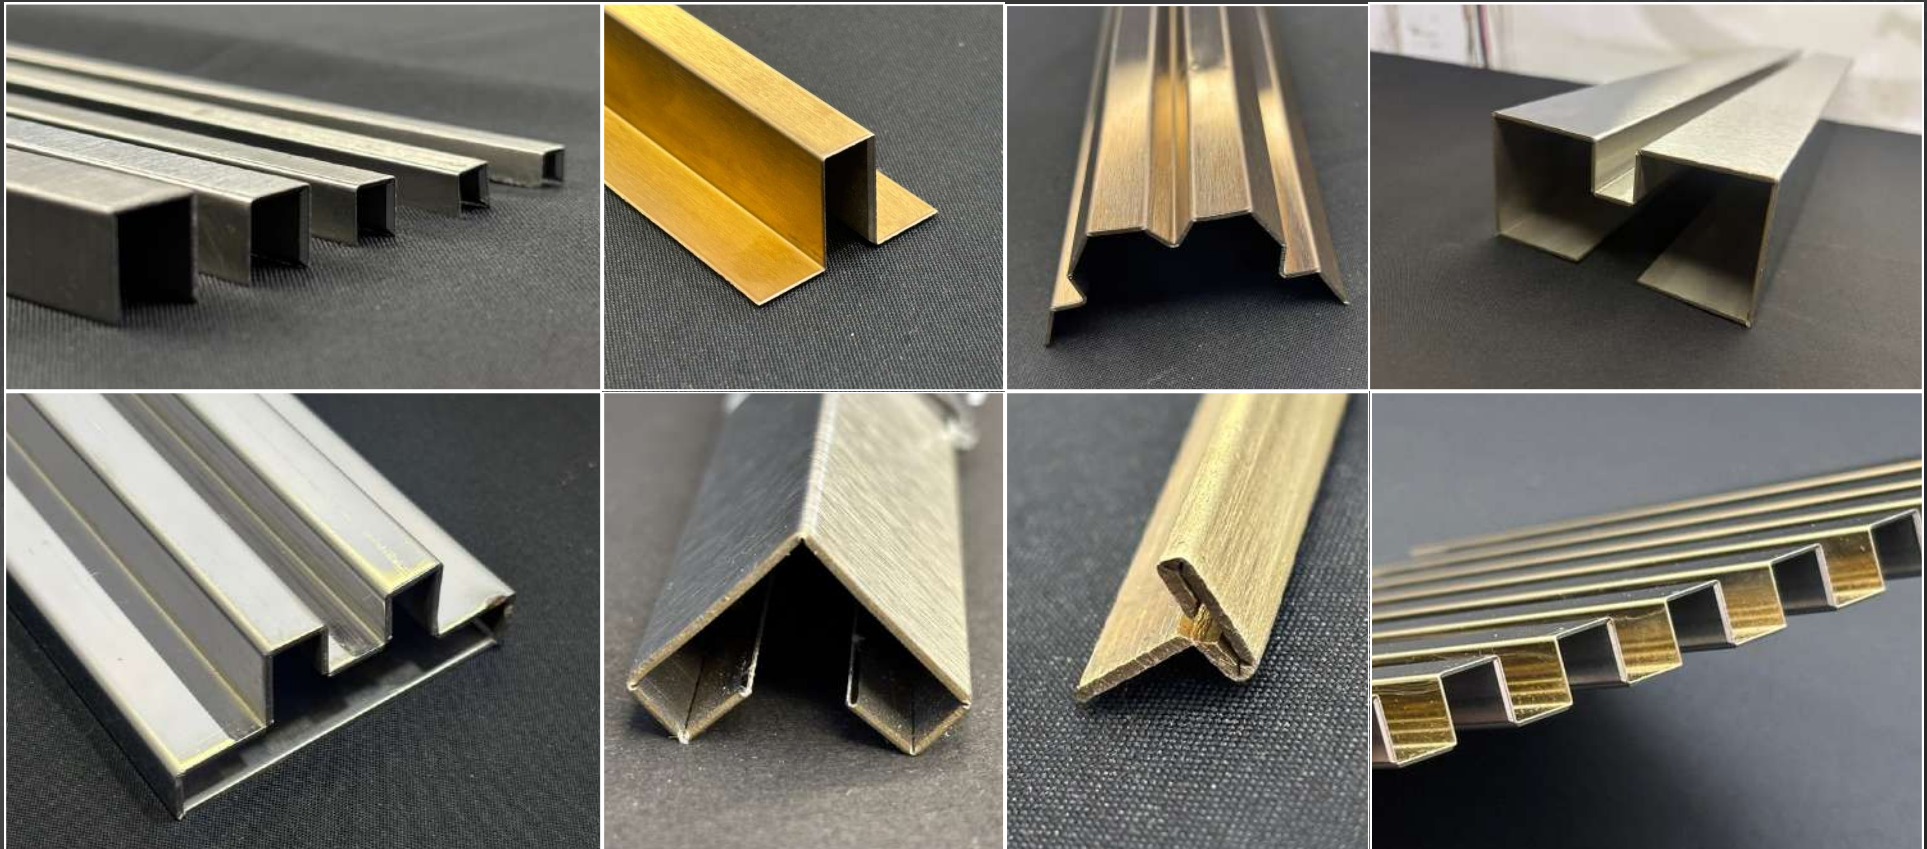

From 0.25mm to 4mm Thickness As Per Requirements

Designed for projects that demand precision engineering & premium aesthetics

Custom Metal Profile

Tailor-made fabrication for unique architectural and interior requirements.

From Concept to Production — We Manufacture Customized Metal Profiles with High Dimensional Accuracy.

Custom Metal Profile

Tailor-made fabrication for unique architectural and interior requirements.

From Concept to Production — We Manufacture Customized Metal Profiles with High Dimensional Accuracy.

Actual Brass Profiles

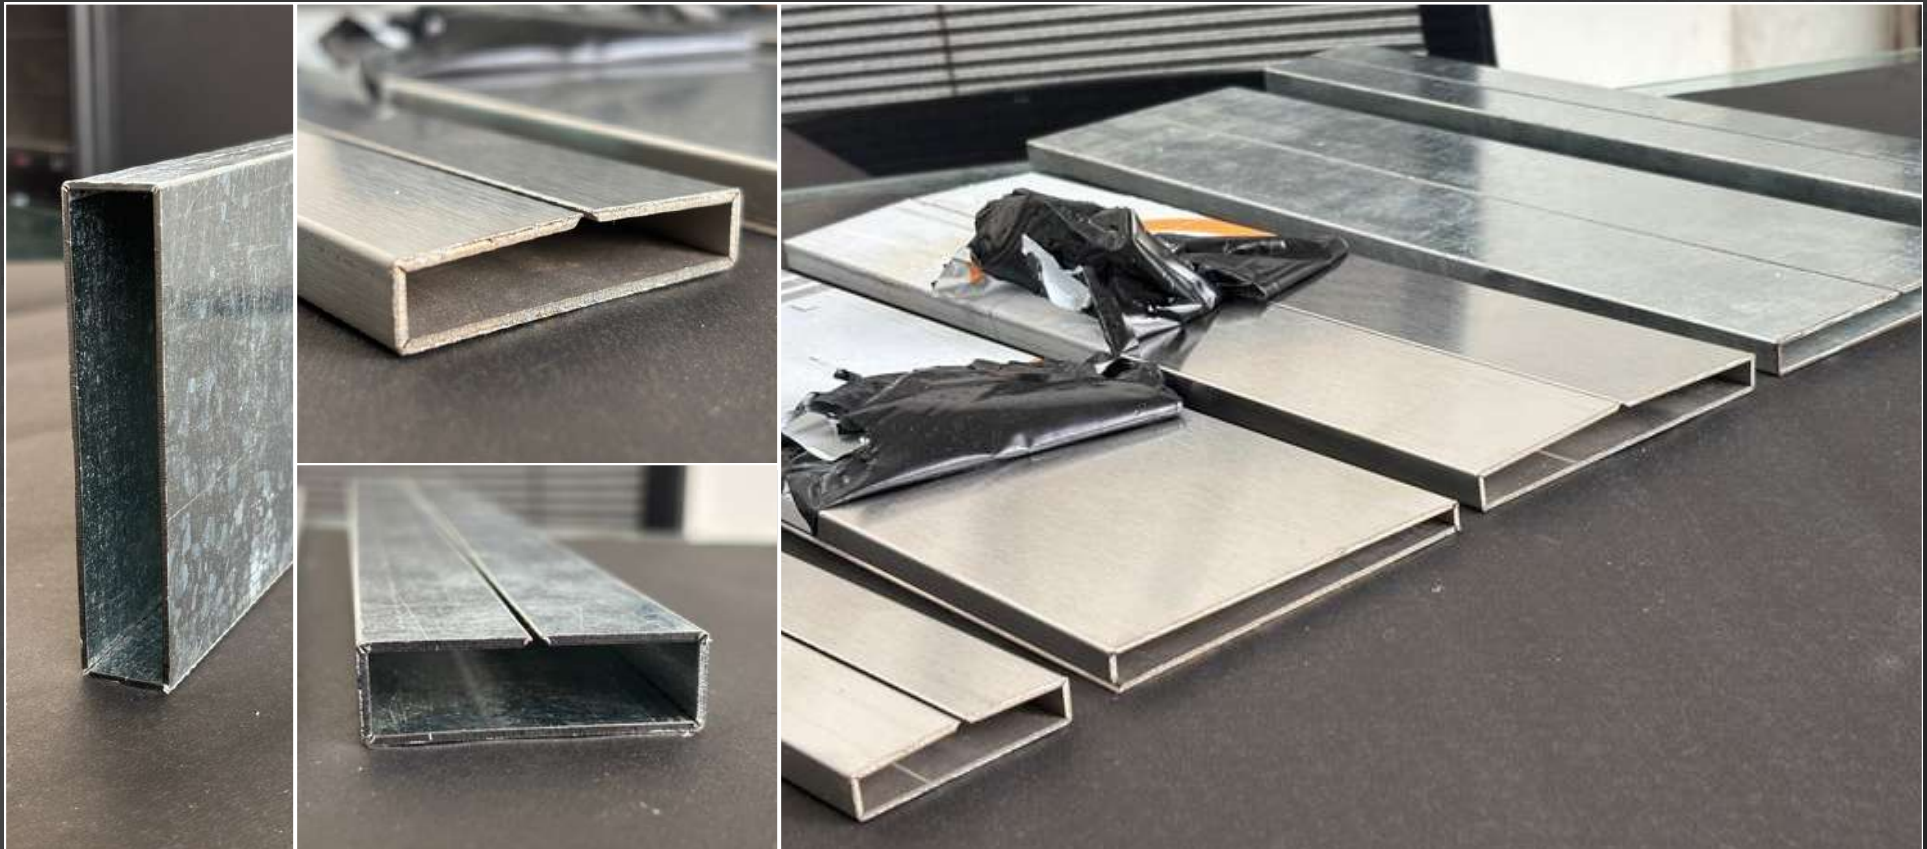

Pure brass gains a richer shine with use and polishing.

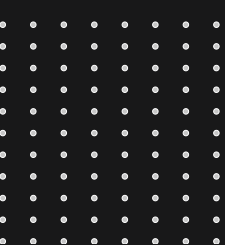

Perfect for wall panels, dividers, furniture accents, and luxury design applications.

Custom Pipe Profile

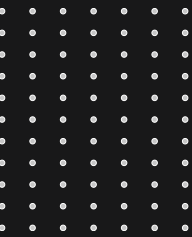

Custom Size | Custom Design | Custom Thickness

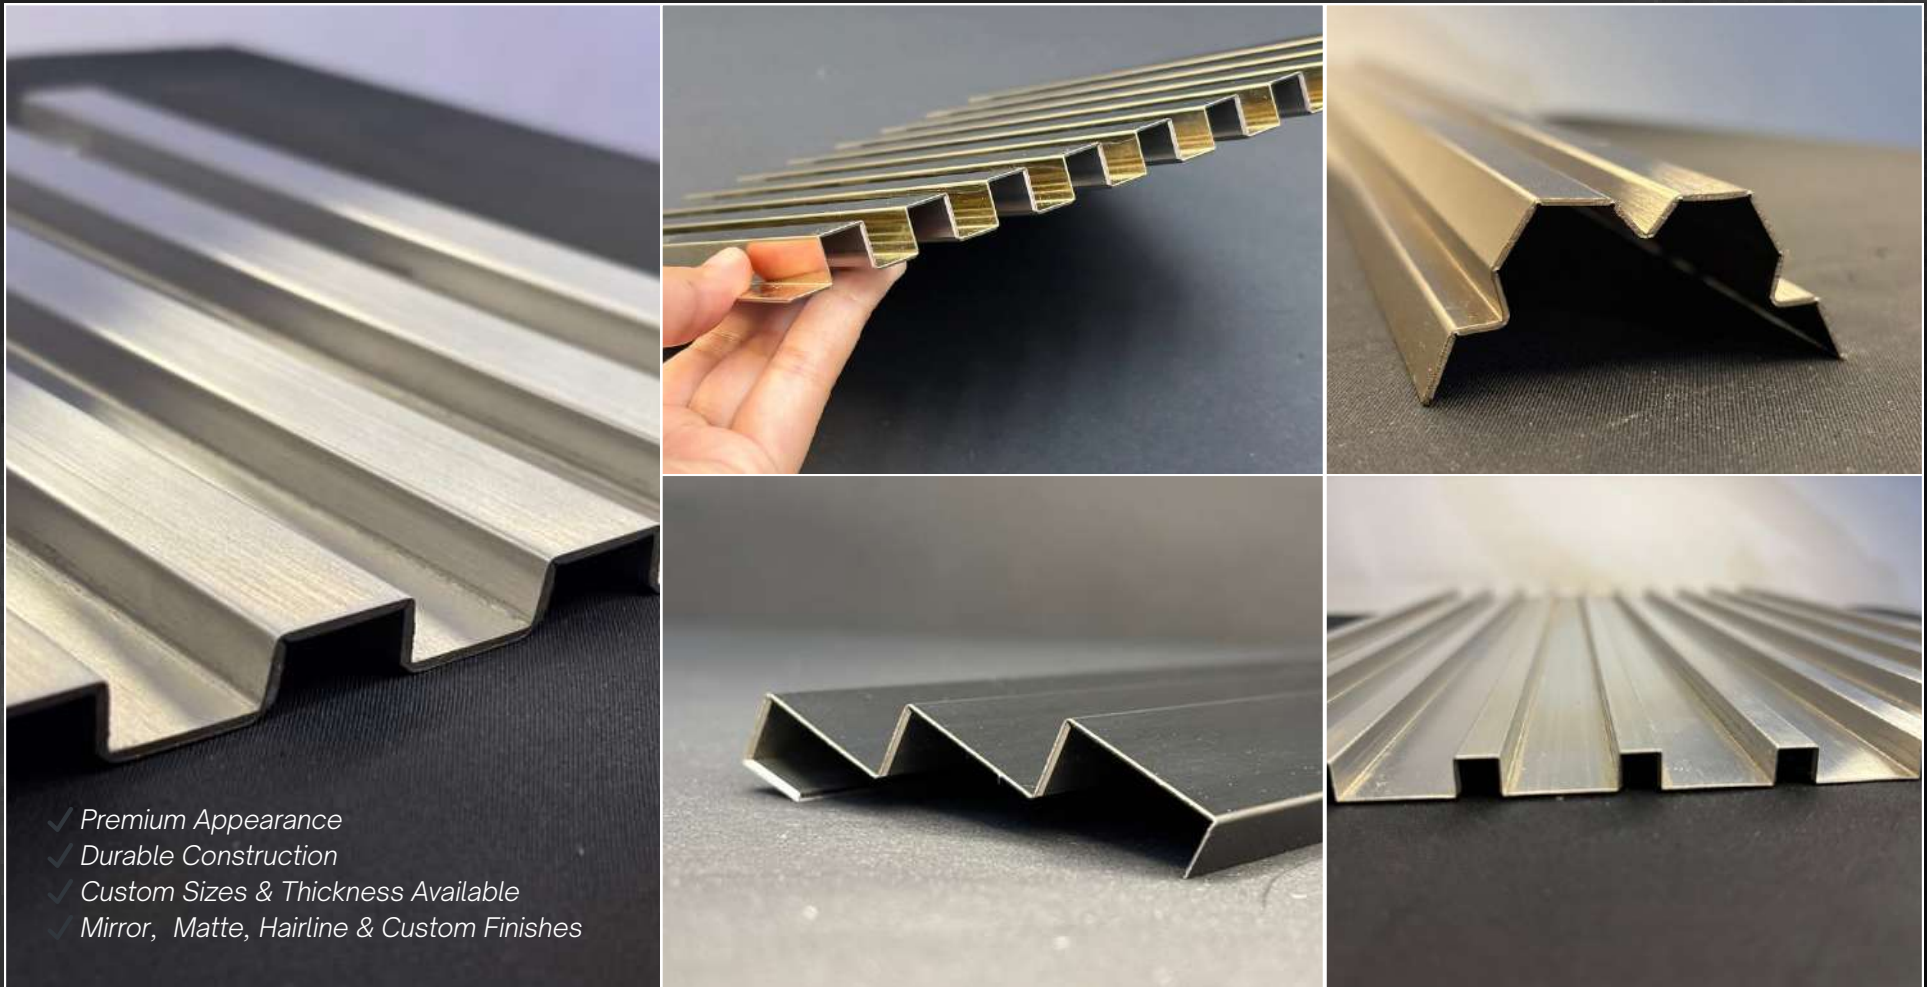

Architectural & Interiors Metal Solution

Premium Fabricated Products For Modern Architecture & Luxury Interiors.

Louvers

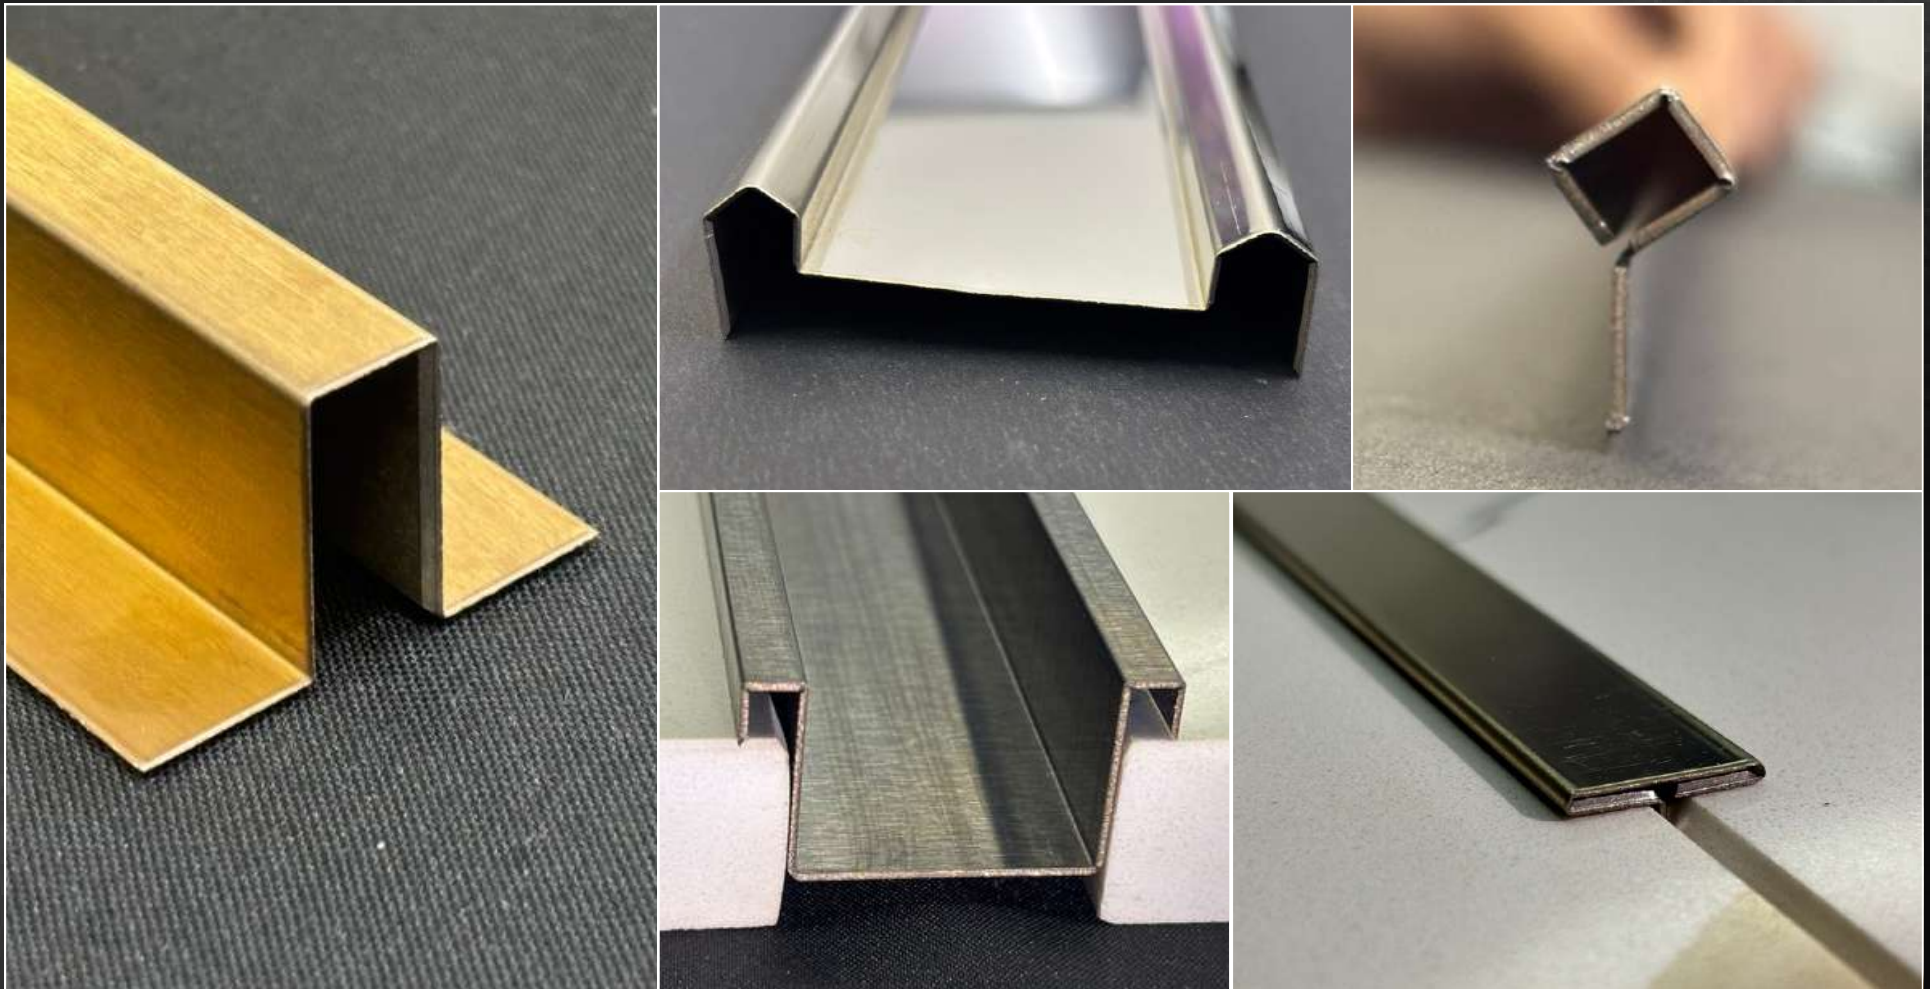

Modern Linear Designs Crafted For Luxury Interiors & Commercial Spaces

Wall & Tile Highlighter

MCS
www.metalcraftstudio.com

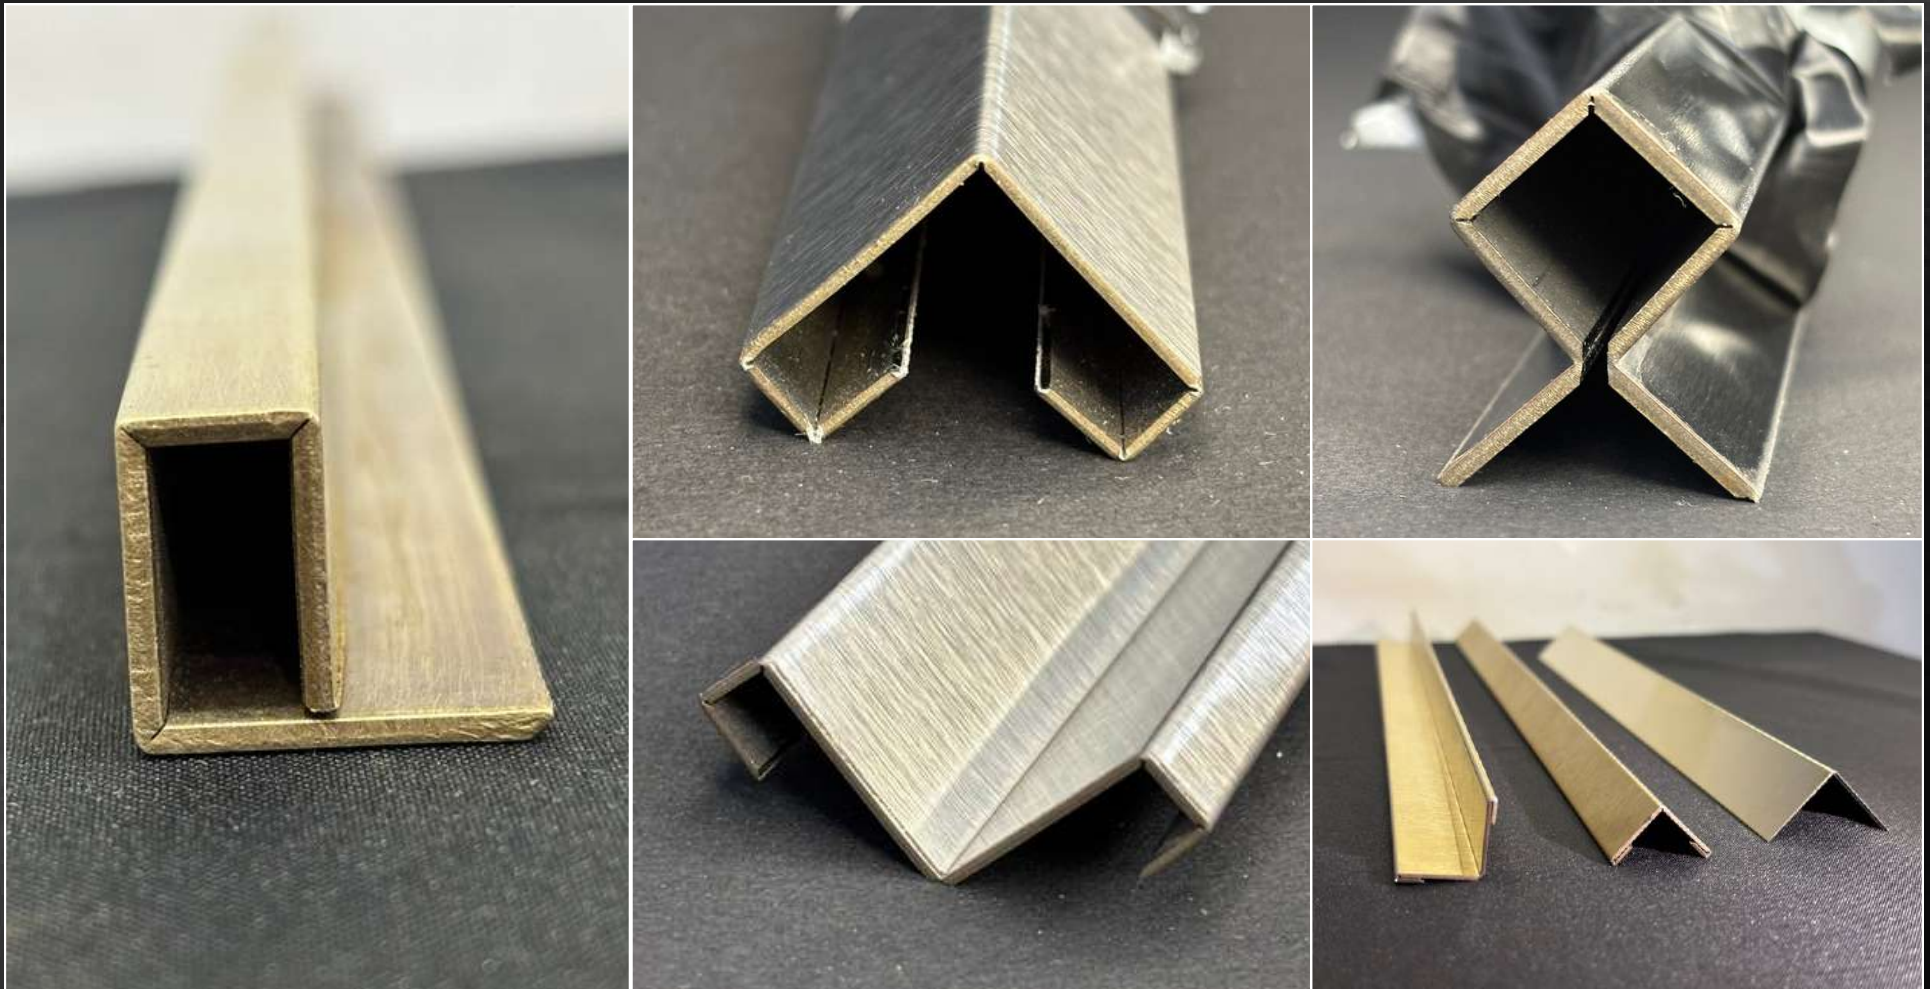

Elegant Metallic Detailing For Walls & Tiles

Custom Corner Profile

MCS
www.metalcraftstudio.com

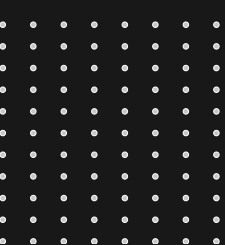

Designed for durability with sleek architectural aesthetics.

Door Handle

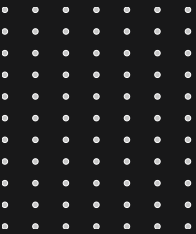

Designed for durability with sleek architectural aesthetics.

Facade

- *Shingles*
- *Inter-Lock Wall Panels*
- *Designer Partitions & Screens*

Perforated Facade

Engineered for modern architecture with durability and elegant aesthetics

Facade Panels

Weather resistant | Long-lasting Finish | Custom Perforation Designs

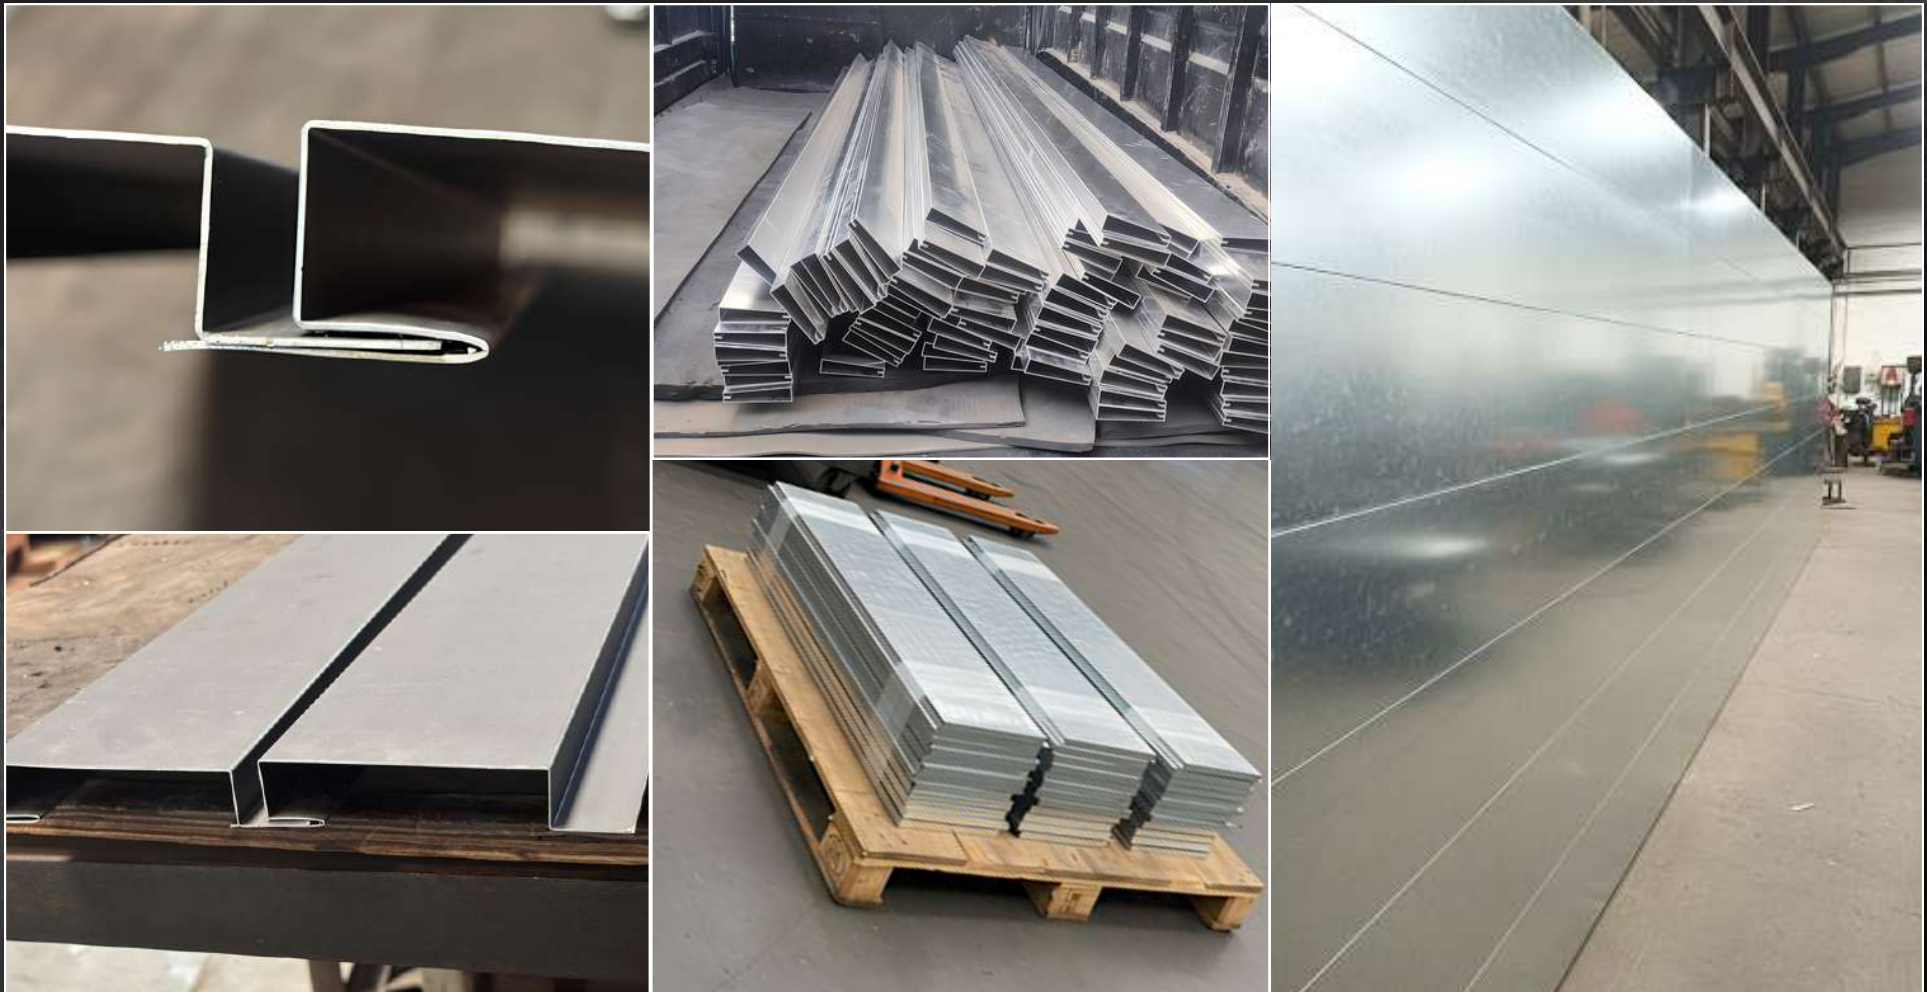

Metal Shingles

Geometric metal surfaces designed for artistic wall applications and architectural facades

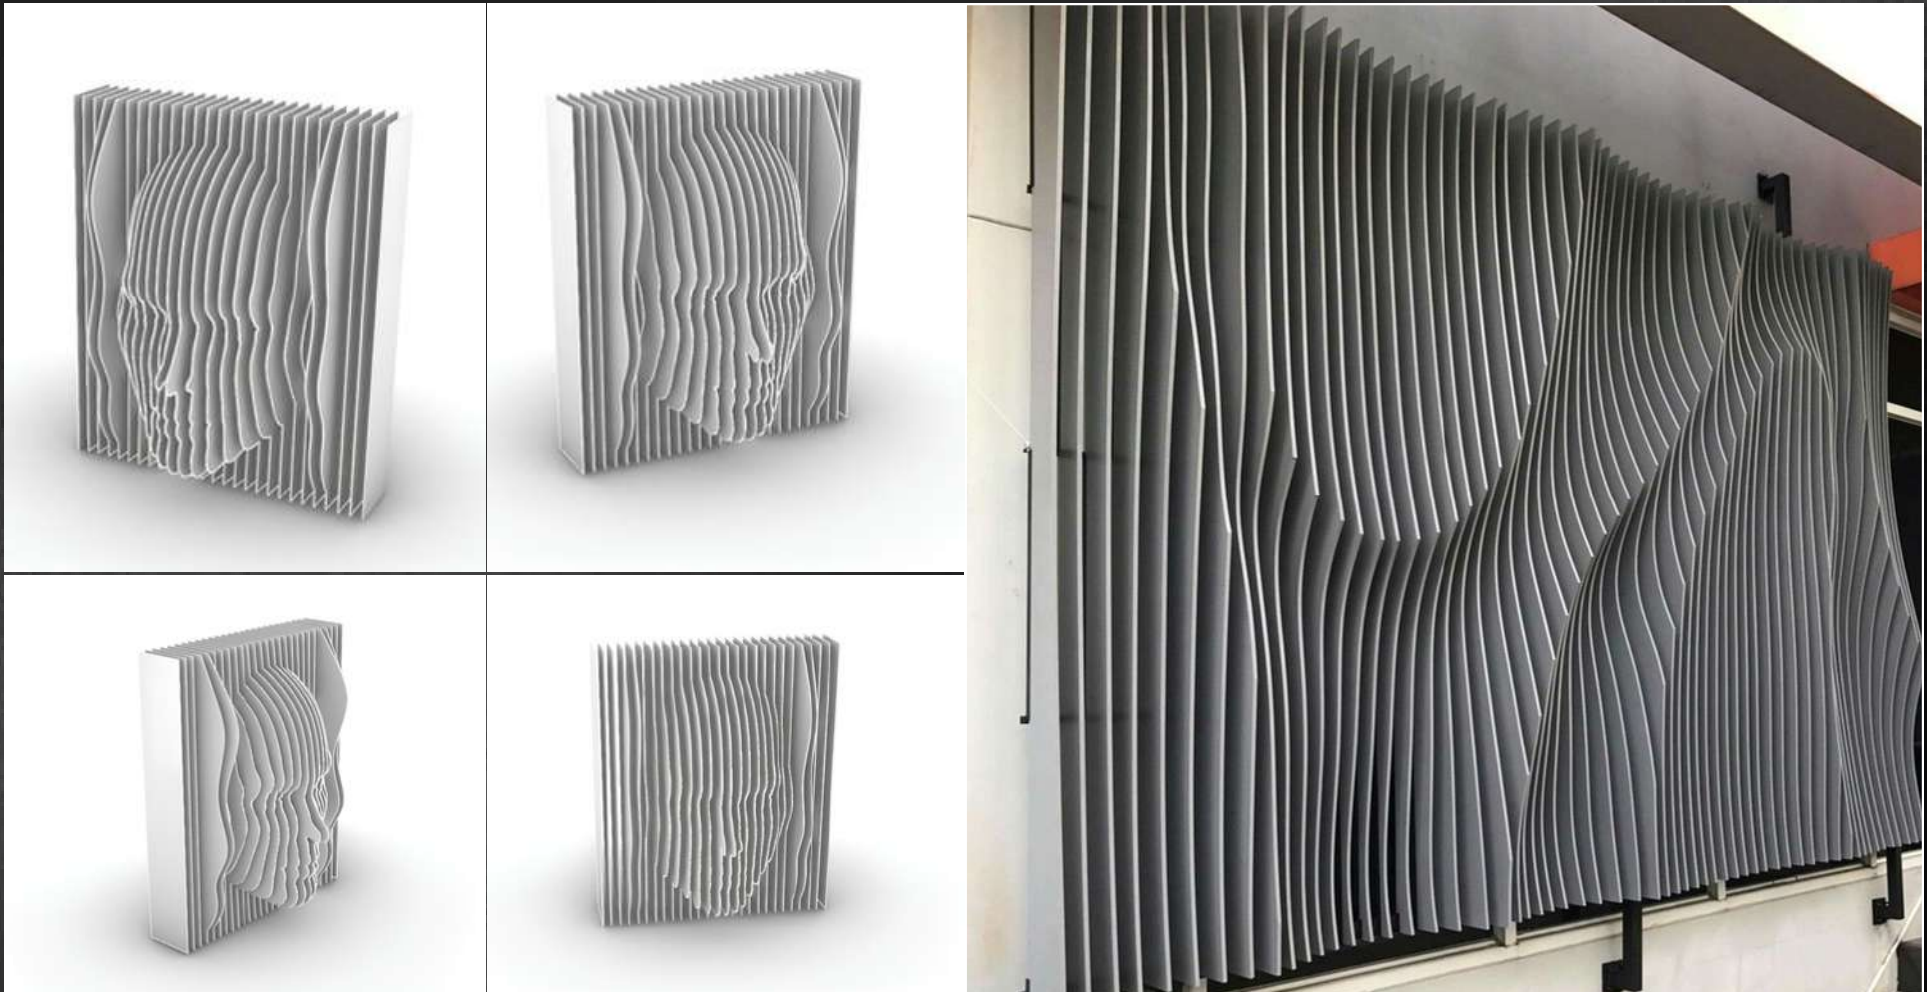

Inter-Lock Wall Panels

Seamless Panel Systems With Clean Finishing, Available in Aluminium, Zinc, and Gl.

Parametric Fins

- Custom patterns and dimensions
- Durable SS / MS fabrication options
- Suitable for interior & exterior applications
- Available in PVD, powder coating, and custom finishes

Designer Partitions & Screens

Luxury decorative partitions crafted with precision laser cutting and premium metallic finishes.

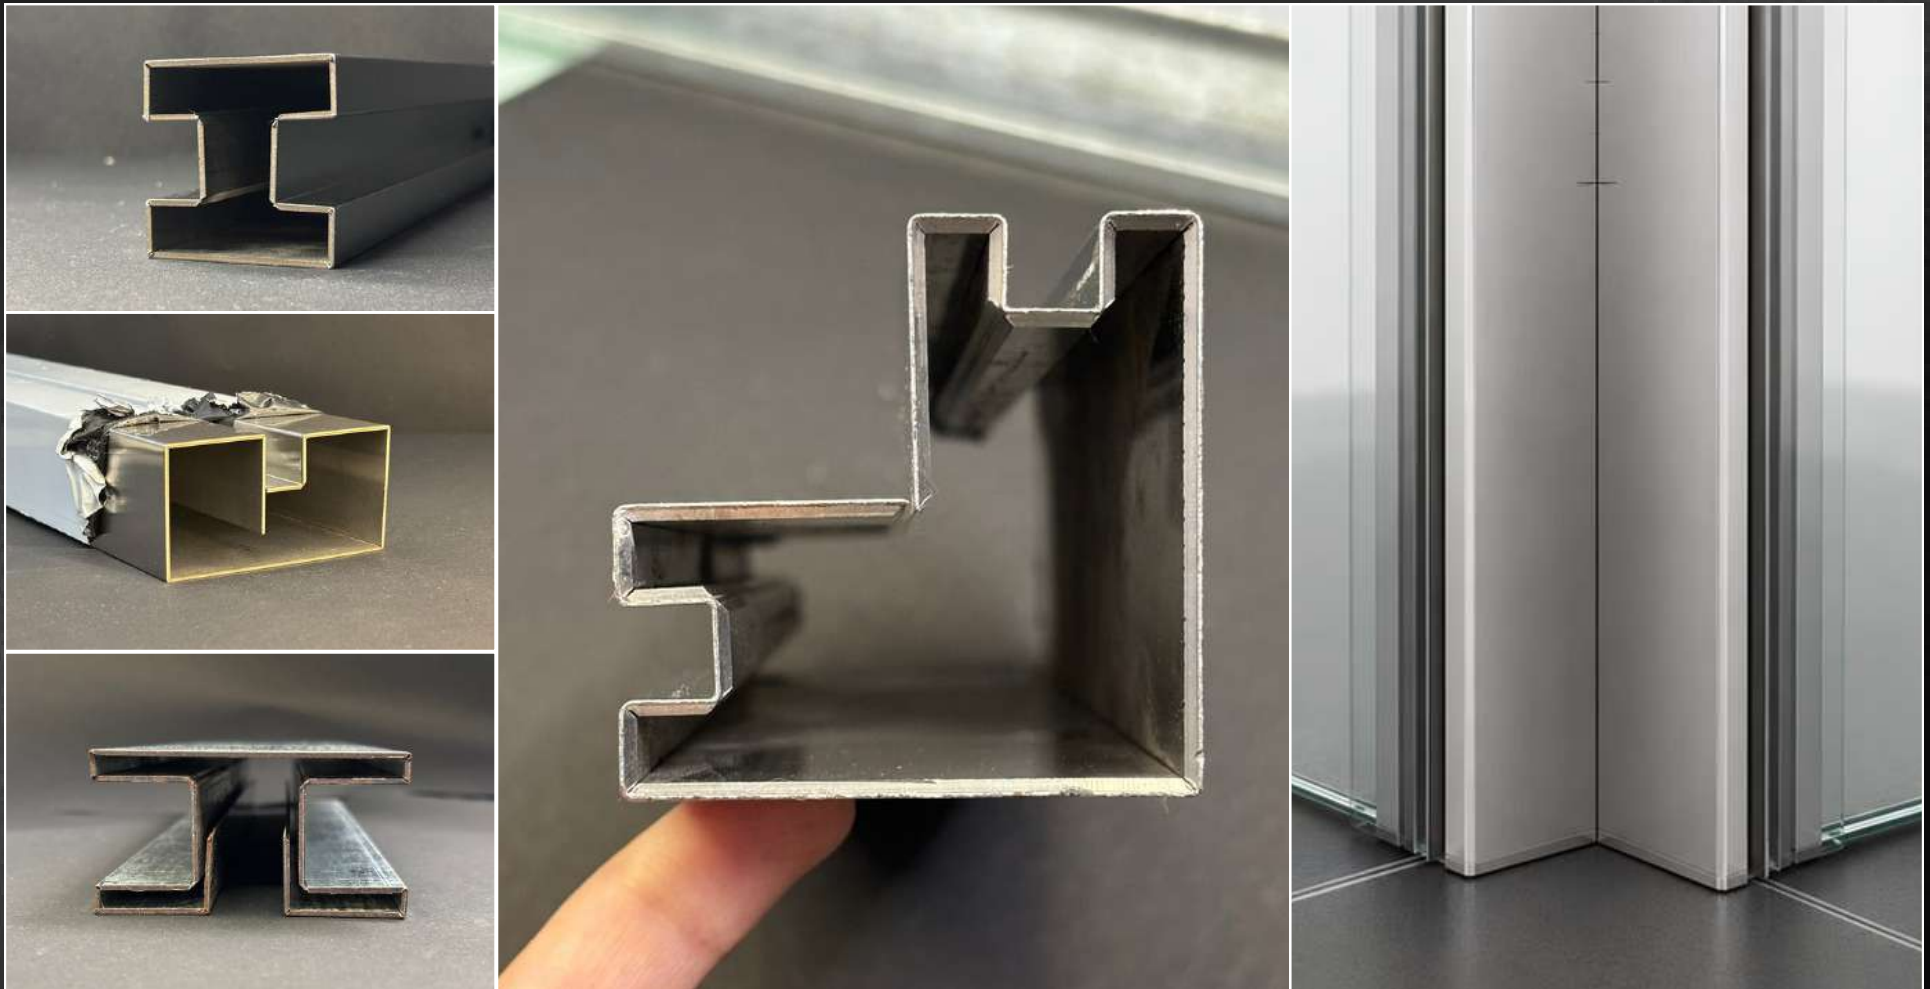

Metal Kitchen Shutters

Rust-free, hygienic, termite-proof, and long-lasting solutions for modern modular kitchens.

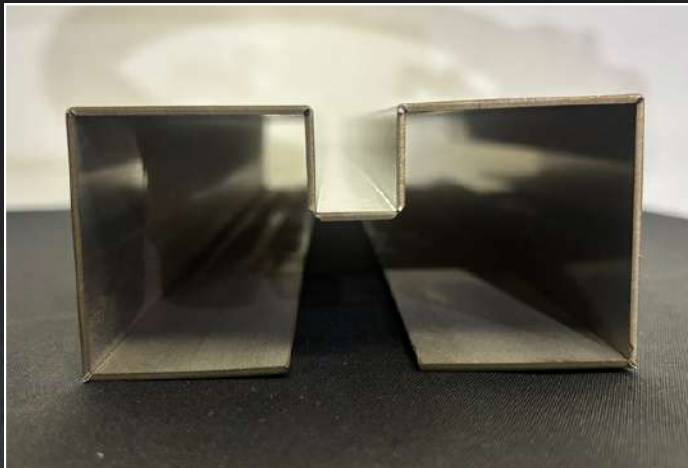

Glass Housings

Strong structural support with sleek premium aesthetics.

Glass Housings

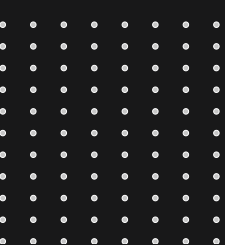

Strong structural support with sleek premium aesthetics.

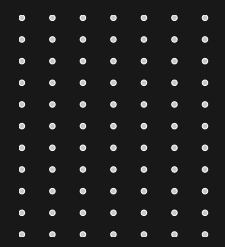

Lift Cladding

Luxury metallic finishes for elevator interiors and entrances.

Celling Solution

- *Baffle*
 - *Aluminium Ceiling Grid*
 - *Metal Ceiling Panels*
- 

Celling Baffle

Advanced metal systems designed for modern commercial and architectural spaces.

Aluminium Ceiling Grid

MCS
www.metalcraftstudio.com

Engineered Grid Systems For Premium Ceiling Solutions

Metal Ceiling Panels

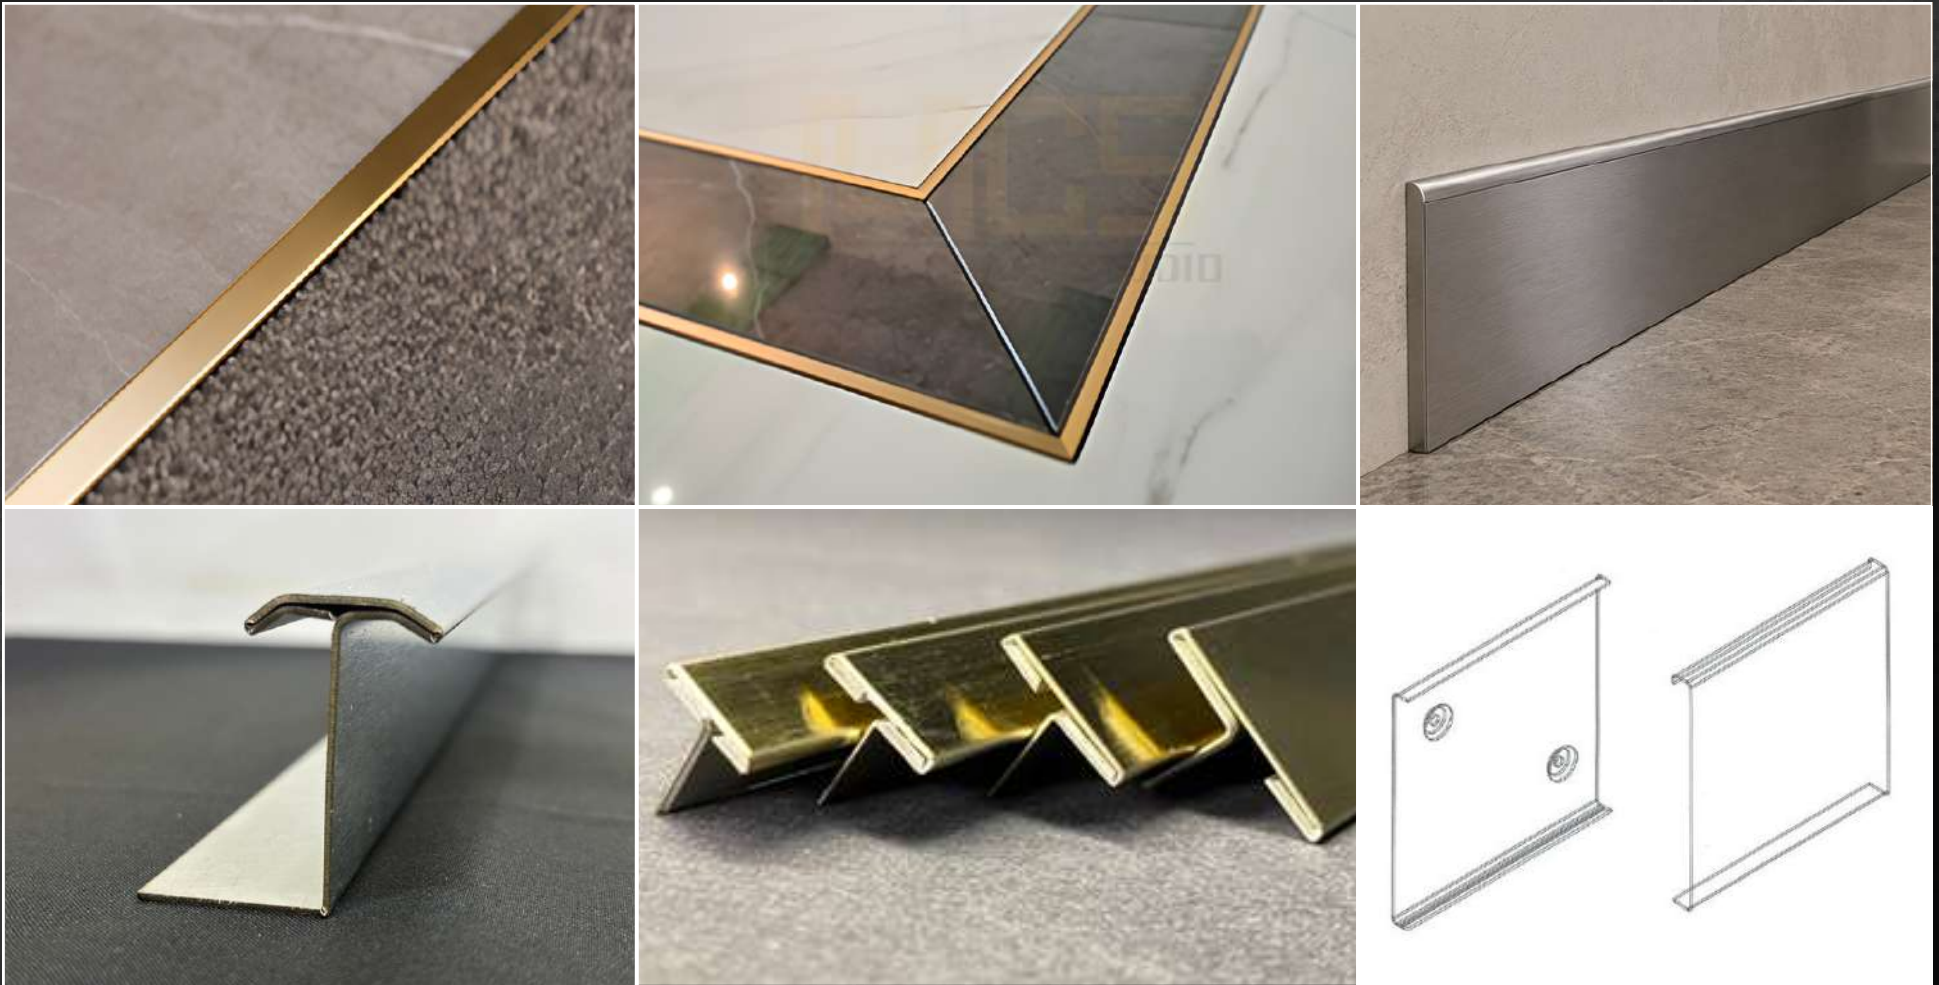

Perforated Ceiling Panels With Architectural Appeal

Floor Solution

MCS
www.metalcraftstudio.com

Premium Profiles For Elegant Flooring Details

MS Customised Profiler Profile

MCS

www.metalcraftstudio.com

Designed for industrial and architectural applications.

Mild-Steel Sheet Metal Work
